http://linkedin.com/in/aeholbrook

Data and evaluation professional specializing in program assessment, survey research, and operational reporting. Combines technical expertise with grassroots leadership, managing weekly mutual aid distributions and public events serving hundreds.

Professional Experience

Volunteer Community Organizer — Local LGBTQ+ Mutual Aid Network | 2024 – Present

Community-building effort centered on recurring public events, community spaces, and mutual support.

- *Sustaining a 100+ member community network through recurring public events and community spaces, strengthening participation, trust, and mutual support.*
- *Executing community events end-to-end: outreach, logistics, volunteer roles, accessibility planning, and partner coordination.*

Founder & Facilitator — Yes, Chef Mutual Aid Network | 2025 – Present

Coordinate weekly surplus community food distributions and volunteer operations.

- *Managing donation logistics, food preparation, and on-site operations for hundreds of volunteers.*
- *Maintaining consistent community communications supporting volunteer turnout and participation.*

Senior Business Operations Engineer — Mastercard | 2023 – 2025

Led operational performance reporting and service monitoring for global payment infrastructure across 40+ countries.

- *Built leadership dashboards integrating multiple data sources into unified reporting for stakeholders across 40+ countries; translated complex metrics into clear, accessible KPIs for decision-making.*
- *Redesigned reporting workflows, reducing data delivery time from hours to seconds; documented processes enabling team self-service and sustainable operations.*
- *Transformed operational data into clear narratives for leadership; created documentation and training materials supporting cross-functional alignment.*
- *Mentored 3+ junior engineers in data storytelling and dashboard design, establishing team-wide standards for reporting clarity and user-centric KPIs.*
- *Partnered w/ global teams to design monitoring & service disruption response workflows.*

Business Operations Engineer II — Mastercard | 2022 – 2023

Built automation, reporting tools, and repeatable workflows supporting operational execution.

- *Developed automation for consistent, repeatable workflows to reduce manual operational toil.*
- *Led documentation for & onboarding of new team members for complex app ecosystem.*

Business Operations Engineer I — Mastercard | 2021 – 2022

Supported operational reporting and incident response for distributed systems.

- *Built alerts & dashboards for real-time system health visibility and operational reporting.*
- *Resolved 1,000+ production incidents annually for distributed payment systems.*

DevOps Assistantship — SIU Edwardsville / Illinois Department of Transportation | 2020 – 2021

Graduate assistantship supporting infrastructure and delivery workflows for public-sector systems.

- *Migrated critical public-sector infrastructure from Linux to Windows Server to gov't specifications.*

Founder & Director The Energy Illinois Project | 2019 – 2020

Designed a practicum-style program pairing engineering students with energy-industry mentors to deliver free energy audits & efficiency plans for local businesses.

- *Designed program structure and workflows for student teams & professional mentorship.*
- *Presented program concept to professional engineer association; explored other funding pathways.*

Associate Consultant SIU Applied Research Consultants | 2019 – 2020

Delivered end-to-end survey research and evaluation consulting for local and regional stakeholders.

- *Consulted end-to-end: Performed survey methodology & public research for dozens of stakeholders.*
- *Designed and executed survey projects: stakeholder intake, survey design, analysis, & reporting.*
- *Built R-based descriptive analysis & visualization pipelines for reports using survey data.*
- *Produced reports & presentations translating findings into actionable recommendations.*

Volunteer Lab Associate SIU Applied Research & Neuroscience Labs | 2018 – 2020

Supported academic research through analysis tooling and automated processing workflows.

- *Built data workflows in Python & R, accelerating analysis turnaround & improving reproducibility.*

Education

Graduate Coursework, Computer Science, SIU Edwardsville Data Science Focus | 2020 – 2021

- *Graduate assistantship focused on CI/CD & data pipeline development with Illinois DOT.*

M.S. Applied Psychology, Southern Illinois University Applied Statistics Focus | 2019 – 2020

- *Practicum experience focused on statistical analysis, survey methodology, & research design. 3.8 GPA.*

B.A. Psychology, Southern Illinois University Neuroscience Specialization | 2014 – 2019

- *Specializations: Addiction Neurophysiology; Neurotrauma & Rehabilitation. Led student groups.*

B.A. Photography, Southern Illinois University Documentary Specialization | 2014 – 2019

Projects

- ***net4nets (EEG Deep Learning Classification Pipeline)*** *– Built an end-to-end deep learning pipeline to classify smoking vs 24h abstinence from 29-electrode EEG. generated time-frequency/PSD features across frequency bands, trained and evaluated a CNN with validation/testing workflows.*
- ***regression_lesson_jupyter*** *– Python tutorial explaining linear regression concepts with intuitive examples and visual walk-throughs.*
- ***2020 Commencement Report Pipeline*** *– R-based survey processing pipeline for consulting project; automated cleaning, aggregation, and reporting outputs.*

Curated Skills

Community & Program Operations Event Logistics, Volunteer Coordination, Stakeholder Communication, Accessibility Planning, Needs Assessment, Mutual Aid, Public Speaking

Program Evaluation & Research Program Evaluation, Needs Assessment, Survey Design, Survey Methodology, Research Design, Reporting & Recommendations

Data, Reporting & Analysis Python, R, Excel, SQL, Tableau, Domo, Jupyter, IBM SPSS, KPI Design

Systems & Automation Dashboards & Monitoring (Splunk, Dynatrace, Grafana, Prometheus), Process Documentation, BASH/Powershell, Jira, Git, Docker
