http://linkedin.com/in/aeholbrook

Data, evaluation, & community engagement professional with experience in program evaluation, needs assessment, & end-to-end survey research, alongside building operational reporting & dashboards in complex environments. Community organizer leading recurring public events & mutual aid food distributions serving hundreds weekly, strengthening trust, participation, & follow-through in high-touch community contexts.

Professional Experience

Volunteer Community Organizer Local LGBTQ+ Mutual Aid Network | 2024 – Present

Community-building effort centered on recurring public events, community spaces, & mutual support.

- *Built & sustained a 100+ member community network through recurring public events & community spaces, strengthening participation, trust, & mutual support.*
- *Planned & executed community events end-to-end: outreach, logistics, volunteer roles, accessibility planning, & partner coordination.*

Founder & Facilitator Yes, Chef Mutual Aid Network | 2025 – Present

Coordinate weekly surplus community food distributions & volunteer operations.

- *Coordinate weekly surplus food prep & distribution serving hundreds of community members; manage donation logistics, volunteer scheduling, setup/teardown, & on-site operations.*
- *Maintain consistent community communications supporting volunteer turnout & participation.*

Senior Site Reliability Engineer Mastercard | 2023 – 2025

Senior SRE for global payment infrastructure processing billions in transactions annually across 40+ countries.

- *Architected & deployed 200+ observability monitors across Splunk, Dynatrace, Domo, & Omnibus, achieving 99.99% uptime for critical payment systems.*
- *Engineered monitoring-as-code framework with automated stage testing environments, enabling developers to validate alerts before production deployment.*
- *Built secure Infrastructure-as-Code & CI/CD pipelines using Chef, Jenkins, XLR, Bitbucket, & Groovy, reducing deployment time throughout the delivery lifecycle.*
- *Led comprehensive Domo operational intelligence platform integrating disparate data sources (Salesforce, Splunk, Dynatrace, Jira, Remedy) into live dashboards for ticket volume, remediation metrics, & SLA performance across L2/L3 operations teams.*
- *Rebuilt enterprise data pipelines in Domo; reduced report generation from 2+ hours to seconds while delivering SLO/SLI metrics & BI capabilities for C-suite operations.*
- *Built comprehensive monitoring documentation for Vocalink (Mastercard's account-to-account payment division) in Confluence with catalog of 200+ monitors, alerts, & dashboards featuring self-updating dynamic tables for automated maintenance & instant discoverability.*
- *Led incident response as primary on-call engineer with <5min response SLA; conducted postmortems & drove reliability improvements through SLO/SLI metric adoption.*
- *Coached development teams on observability best practices, security-first engineering, & infrastructure architecture; delivered monitoring documentation & runbooks.*
- *Built leadership dashboards integrating multiple data sources into unified reporting for stakeholders across 40+ countries; translated complex metrics into clear, accessible KPIs for decision-making.*
- *Transformed operational data into clear narratives for leadership; created documentation & training materials supporting cross-functional alignment.*
- *Partnered with global teams to design outage response protocols, alert thresholds, & response workflows.*

Site Reliability Engineer II Mastercard | 2022 – 2023

Primary on-call SRE for MDES tokenization platform; maintained high availability through proactive monitoring, automated remediation, & rapid incident response.

- *Engineered custom unified Python-based terminal platform for Tomcat monitoring, disk management, log rotation, & service control*

with integrated API healthcheck capabilities; rolling dashboard accessible across all systems instead of rote commands on each host.

- *Built companion VSCode automation toolkit with pre-configured connection details, script hotkeys, direct Splunk/Dynatrace integration, & database actions; greatly reduced release execution times & emergency response delays through streamlined operational workflows.*
- *Developed Python & Bash automation scripts for deployment validation, health checks, & compliance reporting, drastically reducing manual operational toil.*
- *Led onboarding & technical training for new SRE team members during platform expansion, delivering comprehensive instruction across 100+ microservices architectures, dozens of customer-specific call paths, & complex multi-service transaction flows.*
- *Applied PCI-DSS compliance automation implementations for payment systems.*
- *Developed automation reducing manual operational work; created documentation supporting consistent, repeatable workflows across the team.*
- *Built operational tools streamlining service disruption response; trained team members on processes that improved response consistency.*

Site Reliability Engineer I Mastercard | 2021 – 2022

Supported operational reporting & incident response for distributed payment systems.

- *Built observability dashboards in Splunk & Dynatrace for real-time system health visibility.*
- *Resolved 1,000+ L2/L3 production incidents annually for distributed payment systems.*
- *Contributed to CI/CD pipeline enhancements including XLR & Pivotal Cloud deployments.*

DevOps Assistantship SIU Edwardsville / Illinois Department of Transportation | 2020 – 2021

Graduate assistantship supporting infrastructure & delivery workflows for public-sector systems.

- *Migrated interactive traffic & weather data website & data pipeline from UNIX Apache to Windows Server IIS; rewrote site files in JavaScript, C++, Bash, & HTML/CSS for the new environment.*
- *Built & configured Microsoft IIS server infrastructure for Illinois DOT public-facing applications.*

Founder & Director The Energy Illinois Project | 2019 – 2020

Designed a practicum-style program pairing engineering students with energy-industry mentors to deliver free energy audits & efficiency plans for local businesses.

- *Designed program structure & workflows for student teams & professional mentors.*
- *Presented program concept to a local Illinois professional engineers association.*

Associate Consultant SIU Applied Research Consultants | 2019 – 2020

Delivered end-to-end survey research & evaluation consulting for local & regional stakeholders.

- *Designed & executed end-to-end survey projects for multiple regional clients: stakeholder intake, survey design in Qualtrics & SurveyMonkey, data analysis in R, Python, SQL, & SPSS, & final reporting.*
- *Built R-based descriptive analysis & visualization pipelines for reports including descriptive statistics, regression analyses, & data visualizations.*
- *Maintained long-term client relationships across Metro East & Southern Illinois businesses & university departments.*
- *Built & maintained entrance/exit surveys for the consultancy to develop curriculum & ease transitions for incoming graduate students.*
- *Maintained an interdisciplinary statistics education platform helping students across fields access data processing resources.*

Research Assistant SIU Integrative Neuroscience Lab | 2019 – 2020

Implemented EEG data processing pipelines on supercomputing infrastructure & supported academic research.

- *Implemented MatLab & Octave EEG data processing pipelines to run in Linux environments on university supercomputers.*
- *Configured 3D imaging software for construction of high-precision electroencephalographic head models.*
- *Proofread & corrected academic papers for publication.*

President SIU Photogenesis | 2018 – 2019

Led university photography organization; grew membership & revenue through client services, fundraising, & event programming.

- *Grew organization membership from 5 to 40 members in a single semester through direct marketing & outreach.*
- *Increased organization funds from $2,000 to over$10,000 by implementing fundraising activities & a new client photography revenue stream.*
- *Oversaw publication of Lux, a nationally recognized fine art photography journal.*

- *Designed new organizational branding, email newsletters, & wrote a new constitution.*

Research Assistant SIU Neurotrauma & Rehabilitation Lab | 2018 – 2019

Conducted behavioral & physiological research on animal models; performed statistical analyses.

- *Administered behavioral tasks & physiological tests on animal models; managed care for research subjects.*
- *Performed & assisted in regression & ANOVA analyses for multiple studies.*
- *Analyzed golgi- & immunofluorescent-stained tissue samples.*

Analog Process Technician Southern Illinois University | 2017 – 2019

Operated & maintained analog film processing equipment for university photography program.

- *Processed color film across multiple formats & analog processes (C41, E6) using hand-operated JOBO processing equipment for all enrolled photography students.*

Research Intern SIU Office of the Assistant Director of Retention | 2016 – 2017

Analyzed student enrollment & retention data for university undergraduate admissions.

- *Performed detailed analysis on student enrollment & retention data in R & SPSS.*

Education

Graduate Coursework, Computer Science, SIU Edwardsville Data Science Focus | 2020 – 2021

- *Graduate assistantship focused on CI/CD & data pipeline development with Illinois DOT.*

M.S. Applied Psychology, Southern Illinois University Applied Statistics Focus | 2019 – 2020

- *Statistics & applied research focus; consulting & statistics coursework. 3.75 GPA.*
- *President, SIU Statistics Club. Graduate Advisor, SIU Photogenesis. Chair, 4+1 Program Committee.*

B.A. Psychology & Photography, Southern Illinois University Neuroscience Specialization; Documentary Specialization | 2014 – 2019

- *Neuroscience specializations: Addiction Neurophysiology; Neurotrauma & Rehabilitation.*
- *President, SIU Photogenesis. Recipient of Photography Merit Scholarships. Awards in Lux National Photography Journal & Little Muddy Film & Photography Festival.*

Projects

- ***Proxmox Homelab*** *– Terraform/Ansible IaC workflows & GitLab CI/CD pipelines with separate production & staging environments with physical isolation. Containerized with Docker Compose; networking using OPNsense.*
- ***instant_resume*** *– Automated LaTeX-based resume generation pipeline with YAML single source of truth, profile-based content filtering, & Next.js web frontend with role-targeted views.*
- ***net4nets (EEG Deep Learning Classification Pipeline)*** *– Convolutional neural net achieving 94% accuracy classifying smokers from resting-state EEGs; end-to-end pipeline with time-frequency/PSD features & CNN validation workflows.*
- ***sequence_align*** *– NumPy-based protein sequence alignment algorithms with substitution matrix scoring.*
- ***regression_lesson_jupyter*** *– Python tutorial explaining linear regression concepts with intuitive examples & visual walk-throughs.*
- ***2020 Commencement Report Pipeline*** *– R-based survey processing pipeline for consulting project; automated cleaning, aggregation, & reporting outputs.*
- ***aeholbrook.com*** *– Personal portfolio site built with Next.js; visual contact-sheet layout linking photography galleries, resume, & project repos with custom typography & scrollable storytelling.*
- ***smalltown.gallery*** *– Interactive documentary photography platform showcasing small towns in Southern Illinois; searchable map interface with image galleries organized by town & year. A project of the Department of Cinema & Photography at SIU.*

Curated Skills

Community & Program Operations Event Logistics, Volunteer Coordination, Stakeholder Communication, Accessibility Planning, Needs Assessment, Mutual Aid, Public Speaking

Program Evaluation & Research Program Evaluation, Needs Assessment, Survey Design, Survey Methodology, Research Design, Reporting & Recommendations

Data, Reporting & Analysis Python, R, Excel, SQL, Tableau, Domo, Jupyter, KPI Design

Systems & Automation Dashboards & Monitoring (Splunk, Dynatrace, Grafana, Prometheus), Process Documentation & Training, Jira, Git, Docker

Infrastructure Docker, Chef, Groovy, Terraform, Pivotal Cloud Foundry, Linux, Tomcat, Proxmox

Observability Grafana, Prometheus, Splunk, Dynatrace, Domo, Omnibus, Datadog

CI/CD & Automation Jenkins, GitLab CI, XLR, Bitbucket, Git, Chef, GitOps

Development Python, C++, PowerShell, Bash, Java, Spring, Groovy, R, REST/SOAP APIs

Security & Compliance PCI-DSS, Artifact Validation, SSL/TLS, VPN, VLANs, DNS, Load Balancing

Incident Management 24/7 On-Call, Incident Postmortems, SLO/SLI, Paging Software, Alerting

Documentation Atlassian Suite, Confluence, Jira, Markdown, Agile, Chef Run Books

Databases PostgreSQL, MySQL, Oracle, MongoDB, Kafka, RabbitMQ, Redis, IBMMQ, Elasticsearch
