Data and evaluation professional transitioning from enterprise operations into nonprofit and community impact work. I build clear, reliable reporting—dashboards, workflows, and data-quality checks that help teams make decisions and deliver services. Grounded in mutual aid organizing through weekly food distributions and public events serving hundreds.

Work Experience

Volunteer Community Organizer — Local Queer Mutual Aid Network | 2024 – Present

Community-building effort centered on recurring public events, community spaces, and mutual support.

- *Sustaining a 100+ member community network through recurring public events and community spaces, strengthening participation, trust, and mutual support.*
- *Executing community events end-to-end: outreach, logistics, volunteer roles, & accessibility planning.*

Founding Member & Facilitator — Yes, Chef Mutual Aid Network | 2025 – Present

Coordinate weekly surplus community food distributions and volunteer operations.

- *Managing donation logistics, food preparation, and on-site operations for dozens of volunteers.*
- *Maintaining consistent community communications supporting volunteer turnout and participation.*

Senior Business Operations Engineer — Mastercard | 2023 – 2025

Led operational performance reporting and service monitoring for global payment infrastructure across 40+ countries.

- *Built leadership dashboards integrating multiple data sources into unified reporting for stakeholders across 40+ countries; translated complex metrics into clear, accessible KPIs for decision-making.*
- *Redesigned reporting workflows, reducing data delivery time from hours to seconds; documented processes enabling team self-service and sustainable operations.*
- *Implemented data quality checks and reporting standards to ensure KPI accuracy and consistency across recurring stakeholder reports.*
- *Created leadership-ready reporting narratives and documentation; mentored 3+ engineers in data storytelling and dashboard design standards.*
- *Partnered with global teams to design monitoring and service disruption response workflows.*

Business Operations Engineer II — Mastercard | 2022 – 2023

Built reporting tools and automation to reduce manual work and improve operational consistency.

- *Developed automation for consistent, repeatable workflows to reduce manual operational toil.*
- *Led documentation for & onboarding of new team members for complex app ecosystem.*

Business Operations Engineer I — Mastercard | 2021 – 2022

Supported operational reporting and incident response for distributed systems.

- *Built alerts & dashboards for real-time system health visibility and operational reporting.*
- *Resolved 1,000+ production incidents annually for distributed payment systems.*

DevOps Assistantship — SIU Edwardsville / Illinois Department of Transportation | 2020 – 2021

Graduate assistantship supporting infrastructure and delivery workflows for public-sector systems.

- *Migrated critical public-sector infrastructure from Linux to Windows Server to gov't specifications.*

Founder & Director The Energy Illinois Project | 2019 – 2020

Designed a practicum-style program pairing engineering students with energy-industry mentors to deliver free energy audits & efficiency plans for local businesses.

- *Designed program structure and workflows for student teams & professional mentorship.*
- *Presented program concept to professional engineer association; explored other funding pathways.*

Associate Consultant SIU Applied Research Consultants | 2019 – 2020

Delivered end-to-end survey research and evaluation consulting for local and regional stakeholders.

- *Consulted end-to-end: Performed survey methodology & public research for dozens of stakeholders.*
- *Designed and executed survey projects: stakeholder intake, survey design, analysis, & reporting.*
- *Built R-based descriptive analysis & visualization pipelines for reports using survey data.*
- *Produced reports & presentations translating findings into actionable recommendations.*

Volunteer Lab Associate SIU Applied Research & Neuroscience Labs | 2018 – 2020

Supported academic research through analysis tooling and automated processing workflows.

- *Built data workflows in Python & R, accelerating analysis turnaround & improving reproducibility.*

Education

Graduate Coursework, Computer Science, SIU Edwardsville Data Science Focus | 2020 – 2021

- *Graduate assistantship focused on CI/CD & data pipeline development with Illinois DOT.*

M.S. Applied Psychology, Southern Illinois University Applied Statistics Focus | 2019 – 2020

- *Practicum experience focused on statistical analysis, survey methodology, & research design. 3.8 GPA.*

B.A. Psychology, Southern Illinois University Neuroscience Specialization | 2014 – 2019

- *Specializations: Addiction Neurophysiology; Neurotrauma & Rehabilitation. Led student groups.*

B.A. Photography, Southern Illinois University Documentary Specialization | 2014 – 2019

Projects

- ***net4nets (EEG Deep Learning Classification Pipeline)*** *– Built an end-to-end deep learning pipeline to classify smoking vs 24h abstinence from 29-electrode EEG. generated time-frequency/PSD features across frequency bands, trained and evaluated a CNN with validation/testing workflows.*
- ***regression_lesson_jupyter*** *– Python tutorial explaining linear regression concepts with intuitive examples and visual walk-throughs.*
- ***2020 Commencement Report Pipeline*** *– R-based survey processing pipeline for consulting project; automated cleaning, aggregation, and reporting outputs.*

Curated Skills

Community & Program Operations Event Logistics, Volunteer Coordination, Stakeholder Communication, Accessibility Planning, Mutual Aid, Public Speaking

Program Evaluation & Research Program Evaluation, Needs Assessment, Survey Design, Survey Methodology, Research Design, Reporting & Recommendations

Data, Reporting & Analysis Excel (Pivot Tables, Power Query, XLOOKUP), SQL, Tableau, Domo, Python, R, Jupyter, IBM SPSS, KPI Design

Systems & Automation Dashboards & Monitoring (Splunk, Dynatrace, Grafana, Prometheus), Process Documentation, Bash / PowerShell, Jira, Git, Docker
