Data and community engagement professional specializing in program operations, reporting, and stakeholder-ready insights. Build dashboards, operational reporting, and analytics tooling in complex environments. Community organizer leading recurring public events and mutual aid food distributions serving hundreds weekly, strengthening participation, trust, and follow-through in high-touch community contexts.

Professional Experience

Volunteer Community Organizer — Local LGBTQ+ Mutual Aid Network | 2024 – Present

Community-building effort centered on recurring public events, community spaces, and mutual support.

- *Built and sustained a 100+ member community network through recurring public events and community spaces, strengthening participation, trust, and mutual support.*
- *Planned and executed community events end-to-end: outreach, logistics, volunteer roles, accessibility planning, and partner coordination.*
- *Synthesized community needs into actionable follow-ups, connecting individuals to resources and improving continuity across events.*

Founder and Facilitator — Yes, Chef Mutual Aid Network | 2025 – Present

Coordinate weekly surplus community food distributions and volunteer operations.

- *Coordinate weekly surplus food prep and distribution serving hundreds of community members; manage donation logistics, volunteer scheduling, setup/teardown, and on-site operations.*
- *Maintain consistent community communications supporting volunteer turnout, reliability, and repeat participation.*

Senior Business Operations Engineer — Mastercard | 2023 – 2025

Led operational performance reporting and service monitoring for global payment infrastructure across 40+ countries.

- *Built leadership dashboards integrating multiple data sources into unified reporting for stakeholders across 40+ countries; translated complex metrics into clear, accessible KPIs for decision-making.*
- *Redesigned reporting workflows, reducing data delivery time from hours to seconds; documented processes enabling team self-service and sustainable operations.*
- *Transformed operational data into clear narratives for leadership; created documentation and training materials supporting cross-functional alignment.*
- *Designed monitoring strategies and service disruption response protocols; partnered with global teams to set alert thresholds and response workflows.*

Business Operations Engineer II — Mastercard | 2022 – 2023

Built automation, reporting tools, and repeatable workflows supporting operational execution.

- *Developed automation reducing manual operational work; created documentation supporting consistent, repeatable workflows across the team.*
- *Built operational tools streamlining service disruption response; trained team members on processes that improved response consistency.*
- *Led onboarding and enablement for new team members across complex service ecosystems; delivered documentation supporting knowledge transfer.*

Business Operations Engineer I Mastercard | 2021 – 2022

Supported operational reporting and incident response for distributed systems.

- *Built dashboards for real-time system health visibility and operational reporting; improved stakeholder visibility and data-driven decision-making.*
- *Resolved 1,000+ production incidents annually for distributed payment systems; coordinated cross-functional troubleshooting and long-term fixes.*

DevOps Assistantship SIU Edwardsville / Illinois Department of Transportation | 2020 – 2021

Graduate assistantship supporting infrastructure and delivery workflows for public-sector systems.

- *Migrated and recompiled critical public-sector infrastructure from Linux to Windows Server, improving operational compatibility and maintainability.*

Founder and Director Energy Illinois | 2019 – 2020

Designed a practicum-style program pairing engineering students with professional engineers and energy-industry mentors to deliver no-cost energy audits and efficiency improvement plans for local businesses and nonprofits.

- *Designed program structure and workflows for student teams to deliver no-cost energy audits and efficiency recommendations with professional mentorship.*
- *Presented program concept to the Illinois Professional Engineers Association; explored university funding pathways and external sponsorship options.*
- *Created documentation including reporting templates and implementation planning; program paused March 2020 due to COVID-19 restrictions.*

Volunteer Lab Associate SIU Applied Research & Neuroscience Labs | 2018 – 2020

Supported academic research through analysis tooling and automated processing workflows.

- *Built automated data processing workflows in Python and R, accelerating analysis turnaround and improving reproducibility.*

Education

Graduate Coursework in Computer Science, SIU Edwardsville Data Science Focus | 2020 – 2021

- *Graduate assistantship focused on CI/CD and data pipeline development with Illinois DOT.*

M.S. Applied Psychology, Southern Illinois University Data Science Specialization | 2019 – 2020

- *Practicum experience focused on statistical analysis and research methodology. 3.8 GPA.*

B.A. Psychology, Southern Illinois University Neuroscience Specialization | 2014 – 2019

- *Specializations: Addiction Neurophysiology; Neurotrauma & Rehabilitation. Led student groups.*

B.A. Photography, Southern Illinois University Documentary Specialization | 2014 – 2019

Projects

- ***regression_lesson_jupyter*** *– Python tutorial explaining linear regression concepts with intuitive examples and visual walk-throughs.*
- ***2020 Commencement Report Pipeline*** *– R-based survey processing pipeline for consulting project; automated cleaning, aggregation, and reporting outputs.*

Curated Skills

Community & Program Operations Event Logistics, Volunteer Coordination, Partner Stakeholder

Communication, Accessibility Planning, Community Needs Assessment, Mutual Aid Operations, Public Speaking

Data, Reporting & Evaluation Python, R, Excel, SQL, Tableau, Domo, Jupyter, Data Storytelling, KPI Design Reporting

Systems & Automation Dashboards Monitoring (Splunk, Dynatrace, Grafana, Prometheus), Process Documentation Training, Automation (Python, Bash, PowerShell), Jira / Confluence, Git, Docker
