Senior Site Reliability Engineer with 5+ years building reliable, observable infrastructure for mission-critical payment systems. Expert in CI/CD automation, Infrastructure-as-Code, & observability platforms (Splunk, Dynatrace, Domo). Proven ability to multiply team effectiveness through scalable tooling & operational excellence.

Professional Experience

Senior Site Reliability Engineer Mastercard | 2023 – 2025

Senior SRE for global payment infrastructure processing billions in transactions annually across 40+ countries.

- *Architected & deployed 200+ observability monitors across Splunk, Dynatrace, Domo, & Omnibus, achieving 99.99% uptime for critical payment systems.*
- *Engineered monitoring-as-code framework with automated stage testing environments, enabling developers to validate alerts before production deployment.*
- *Built secure Infrastructure-as-Code & CI/CD pipelines using Chef, Jenkins, XLR, Bitbucket, & Groovy, reducing deployment time throughout the delivery lifecycle.*
- *Led comprehensive Domo operational intelligence platform integrating disparate data sources (Salesforce, Splunk, Dynatrace, Jira, Remedy) into live dashboards for ticket volume, remediation metrics, & SLA performance across L2/L3 operations teams.*
- *Rebuilt enterprise data pipelines in Domo; reduced report generation from 2+ hours to seconds while delivering SLO/SLI metrics & BI capabilities for C-suite operations.*
- *Built comprehensive monitoring documentation for Vocalink (Mastercard's account-to-account payment division) in Confluence with catalog of 200+ monitors, alerts, & dashboards featuring self-updating dynamic tables for automated maintenance & instant discoverability.*

Site Reliability Engineer II Mastercard | 2022 – 2023

Primary on-call SRE for MDES tokenization platform; maintained high availability through proactive monitoring, automated remediation, & rapid incident response.

- *Engineered custom unified Python-based terminal platform for Tomcat monitoring, disk management, log rotation, & service control with integrated API healthcheck capabilities; rolling dashboard accessible across all systems instead of rote commands on each host.*
- *Built companion VSCode automation toolkit with pre-configured connection details, script hotkeys, direct Splunk/Dynatrace integration, & database actions; greatly reduced release execution times & emergency response delays through streamlined operational workflows.*
- *Developed Python & Bash automation scripts for deployment validation, health checks, & compliance reporting, drastically reducing manual operational toil.*
- *Led onboarding & technical training for new SRE team members during platform expansion, delivering comprehensive instruction across 100+ microservices architectures, dozens of customer-specific call paths, & complex multi-service transaction flows.*
- *Applied PCI-DSS compliance automation implementations for payment systems.*
- *Developed automation reducing manual operational work; created documentation supporting consistent, repeatable workflows across the team.*

Site Reliability Engineer I Mastercard | 2021 – 2022

Supported operational reporting & incident response for distributed payment systems.

- *Built observability dashboards in Splunk & Dynatrace for real-time system health visibility.*
- *Resolved 1,000+ L2/L3 production incidents annually for distributed payment systems.*
- *Contributed to CI/CD pipeline enhancements including XLR & Pivotal Cloud deployments.*

DevOps Assistantship SIU Edwardsville / Illinois Department of Transportation | 2020 – 2021

Graduate assistantship supporting infrastructure & delivery workflows for public-sector systems.

- *Migrated interactive traffic & weather data website & data pipeline from UNIX Apache to Windows Server IIS; rewrote site files in JavaScript, C++, Bash, & HTML/CSS for the new environment.*

- *Built & configured Microsoft IIS server infrastructure for Illinois DOT public-facing applications.*

Research Assistant SIU Integrative Neuroscience Lab | 2019 – 2020

Implemented EEG data processing pipelines on supercomputing infrastructure & supported academic research.

- *Implemented MatLab & Octave EEG data processing pipelines to run in Linux environments on university supercomputers.*

Curated Skills

Data, Reporting & Analysis Python, R, Excel, SQL, Tableau, Domo, Jupyter, KPI Design

Systems & Automation Dashboards & Monitoring (Splunk, Dynatrace, Grafana, Prometheus), Process Documentation & Training, Jira, Git, Docker

Infrastructure Docker, Chef, Groovy, Terraform, Pivotal Cloud Foundry, Linux, Tomcat, Proxmox

Observability Grafana, Prometheus, Splunk, Dynatrace, Domo, Omnibus, Datadog

CI/CD & Automation Jenkins, GitLab CI, XLR, Bitbucket, Git, Chef, GitOps

Development Python, C++, PowerShell, Bash, Java, Spring, Groovy, R, REST/SOAP APIs

Security & Compliance PCI-DSS, Artifact Validation, SSL/TLS, VPN, VLANs, DNS, Load Balancing

Incident Management 24/7 On-Call, Incident Postmortems, SLO/SLI, Paging Software, Alerting

Documentation Atlassian Suite, Confluence, Jira, Markdown, Agile, Chef Run Books

Databases PostgreSQL, MySQL, Oracle, MongoDB, Kafka, RabbitMQ, Redis, IBMMQ, Elasticsearch

Projects

- ***Proxmox Homelab*** *– Terraform/Ansible IaC workflows & GitLab CI/CD pipelines with separate production & staging environments with physical isolation. Containerized with Docker Compose; networking using OPNsense.*
- ***instant_resume*** *– Automated LaTeX-based resume generation pipeline with YAML single source of truth, profile-based content filtering, & Next.js web frontend with role-targeted views.*
- ***net4nets (EEG Deep Learning Classification Pipeline)*** *– Convolutional neural net achieving 94% accuracy classifying smokers from resting-state EEGs; end-to-end pipeline with time-frequency/PSD features & CNN validation workflows.*
- ***sequence_align*** *– NumPy-based protein sequence alignment algorithms with substitution matrix scoring.*

Education

Graduate Coursework, Computer Science, SIU Edwardsville Data Science Focus | 2020 – 2021

- *Graduate assistantship focused on CI/CD & data pipeline development with Illinois DOT.*
